CAREER OBJECTIVE

Computer Science graduate seeking a Software Developer role where I can apply my hands-on experience in Java, Spring, Hibernate, and full-stack web development to build scalable, reliable applications, while continuously growing my technical skills in a collaborative, fast-paced engineering environment.

SKILLS

Programming Languages: Java

Frontend: HTML, CSS, React.js

Backend: J2EE, Servlets, JSP, JDBC, Hibernate, Spring, Spring Boot, Spring MVC, REST APIs

Databases: MySQL

Core Subjects: OOPS

INTERNSHIP / EXPERIENCE

Software Development Intern

Feb 2026 – Jul 2026

Tap Academy Bangalore

- Built and deployed dynamic web applications using Java, Servlets, JDBC, and MySQL with full CRUD functionality.
- Designed and integrated RESTful APIs for user authentication, session management, and server-side data processing.
- Created responsive front-end interfaces using HTML, CSS, and JavaScript following OOP design principles.

AI Trainee

Mar 2026 – Jun 2026

SuprMentr Technologies Private Limited

- Completed training in AI and Cloud Computing, building foundational skills in machine learning concepts and cloud-based deployment.
- Built the AI Resume Optimizer project during the training, applying AI concepts learned in the course to a real-world use case.
- Gained hands-on exposure to cloud-based deployment while developing and hosting the project.

PROJECTS

Foodly — Full-Stack Food Delivery Marketplace

Feb 2026 – Jul 2026

Java, Jakarta Servlets/JSP, Tomcat 10, MySQL, JDBC

- Architected a three-role marketplace (customer, restaurant partner, administrator) in 106 Java classes across a layered DAO → Service → Controller design with 30+ servlet routes, using no web framework.
- Engineered a privilege-escalation-resistant access model: roles assigned server-side at registration, partner accounts gated behind admin approval, and every partner query scoped to the authenticated session's restaurant ID — blocking forged role requests and cross-tenant access via URL tampering.
- Implemented server-side payment signature verification before order confirmation and access-scoped PDF invoicing, plus a custom CSS design system with light/dark theming and an accessibility-aware animation layer.

AI Resume Optimizer

May 2026 – Jul 2026

Next.js, GPT-4o, LaTeX

Live: resume-optimizer-beta-seven.vercel.app/unlock

- Built an AI-powered resume generation platform using GPT-4o that creates job-tailored resumes from user input.
- Automated a LaTeX → PDF export pipeline integrated with Overleaf for professional-quality document output.
- Deployed a fully responsive web application on Vercel with a clean, user-friendly interface.

ACHIEVEMENTS

- Deloitte Australia Cybersecurity Job Simulation — Completed Deloitte Australia Cybersecurity Job Simulation on Forage — analysed web activity logs and supported a cybersecurity breach investigation.
- Tata Cybersecurity Analyst Simulation — Completed Tata Cybersecurity Analyst Simulation on Forage — focused on Identity and Access Management (IAM) while collaborating with a cybersecurity consulting team.

EDUCATION

Government Engineering College, Challakere

2022 – 2026

BE – Computer Science and Engineering, CGPA: 8.3 | Challakere, Karnataka

Best PU Science and Commerce College, Talikote

2020 – 2022

Pre-University Course (PUC), 86% | Talikote, Karnataka
